## DEBOSSING

Debossing creates an indented image by applying a die to heat-pressed area. Typically used for real and imitation leather items, it adds professionally stylish texture that's great for adding perceived value.

## ENGRAVING

Engraving is achieved through using a laser beam to precisely etch decoration into a surface. This technique produces superb results for metal, glass and wood. An undoubted winner for creating a high-class impression.

## DOMING

Doming is used to create a 3D version of your image by shaping a raised surface beneath the print. A mould is formed, printed and filled with epoxy which is then hardened to maintain its shape. Fantastic for adding extra dimension to your message, doming can be applied to all kinds of materials on flat surfaces. Doming provides durable decoration with strong resistance to fading or damage.
