Our decoration options

Colourprint

We offer a variety of Colourprint methods (Silkscreen, Padprint, or Screenround) and will choose for you the most appropriate method to obtain high visibility for your artwork.

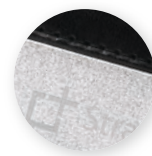

Transfer

Transferring is done by first creating a screen print image on paper and then using heat and glue to transfer it onto the chosen article. This technique can be applied in multiple colours onto all kinds of woven and knitted products and is a good economical solution for multicolour printing of smaller quantities.

Engraving

Engraving is achieved through using a laser beam to precisely etch decoration into a surface. This technique produces superb results for metal, glass and wood. An undoubted winner for creating a high-class impression.
