YOUR UMBRELLA

YOUR
MOMENT

Being in the outdoors, enjoying fresh air and open spaces, feeling the wind and the weather – it's good for us. Even when it's raining or during an unexpected shower. Just grab your favourite umbrella and off you go. These are moments we experience that are special and remain in our fondest memories. With an individual FARE® umbrella, brands and companies become part of this moment.

Being outdoors is closely linked to another theme: being sustainable. That is why we have reduced the

size of the new FARE® FACTBOOK by half. This way, we are saving more than 8.5 tons of paper. At the same time, we want to make it even easier for you to compare products and select suitable umbrellas for your customers. This is what the condensed product view is for. Further details and finishing options are available online, always with our very latest offerings.

In our webshop, you can generate matching data sheets for each article variant at the touch of a button, even with your logo if you wish.

Your FARE team wishes you much success!

Quick news

Highlights 2022

With the FARE® product innovations 2022 we are presenting some highlights again this year, which guarantee plenty of surprises thanks to their clever design and selected details in colour, shape and function, alongside additional variations on well-known and popular umbrella models. Experience the great variety that is possible when choosing FARE® promotional umbrellas!

art. 5519, p. 49

Simply convincing

We believe that an umbrella has to satisfy the demands on functionality, safety and quality to be able to be effective as a long-lasting promotional item. Let yourself be convinced by the solid arguments in favour of a quality umbrella from FARE.

A trustworthy argument:

Many FARE® products are carefully tested.

LABTECH Prüfungsgesellschaft mbH is an independent laboratory accredited by DAkkS, specializing in chemical and physical textile testing and consumer goods. It conducts a full-scale usability test for specific umbrella models. This involves simulating professional use to verify and ensure functionality. In addition, particular attention is paid to the presence of potential weak points that are known to the market, and components are tested for chemical safety. The LABTECH test seal is only awarded to products that are truly flawless. The test seal guarantees the consumer a first-class product that stands out from the crowd. You can find out more about the LABTECH tests at www.labtech-gmbh.de/gebrauchstauglichkeit.html.

Seal example

Products with a test seal are highlighted with the keyword **CERTIFIED** in the product overview. Details on the certified properties can be found in our data sheets.

A watertight argument:

Many FARE® umbrellas are equipped with a high-quality finish.

An even better pearl-off effect or dirt-repellent properties are achieved with complex refinements, depending on the model:

- **Teflon™ fabric protector** is a coating that is water and dirt repellent.
- **Nanotechnology** gives the umbrella cover a minutely rough structure which prevents dirt and water from sticking to the fabric and they simply pearl right off – this is the so-called lotus effect. This coating is absolutely sealed and promotes a particularly long-lasting product life.

A windproof argument:

FARE® umbrellas are strong.

Even our less expensive models excel in their high standards of quality and special windproof features for better wind resistance. The majority of FARE® models are equipped with a reliable windproof system. The highly flexible frame for these models turns over when hit by stronger gusts of wind before the ribs break or the cover is torn from its fastening.

A clean argument:

FARE® products are tested for harmful substances.

LABTECH and other renowned and accredited testing institutes test our products according to REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals). Alongside conformity with REACH, the relevant legal directives for harmful substances are considered and implemented for our products.

A fair argument:

FARE® products are produced under humane conditions.

Member of amfori, the leading global business association for open and sustainable trade. We participate in amfori BSCI. For more information visit www.amfori.org

Discover more on this subject on page 11.

An award-winning argument:

FARE® umbrellas have won several renowned awards.

Red Dot Design Award

- A FARE® product has now been honoured for the thirteenth time by the prestigious 40-member jury of experts at the Red Dot Award: Product Design – most recently in 2021 with the **AC golf umbrella FARE®-DoggyBrella (art. 7395)**.

Promotional Gift Award

- The **AC midsize umbrella FARE®-Sound (art. 7799)** was selected winner of the 2020 Promotional Gift Award in the premium product category.

PSI Sustainability Award

- ÖkoBrella models prevailed in the "Sustainable Product" category in 2017 and 2019 and received awards. In 2021, FARE received the "Innovator of the Year 2021" award in the newly launched PSI Sustainability Awards category. The resource-saving production of the waterSAVE® cover material and the fact that all companies along the value chain from the manufacturer to the end customer – play an exemplary role in sustainability were convincing factors for the jury.

reddot winner 2021

PROMOTIONAL GIFT
AWARD 2020

WINNER

A protective cover – for people and the environment

Everybody talks about sustainability and yet for many this is only an abstract concept. Nevertheless, this principle, which originated in forest management, is as simple as it is sensible: Anyone who only cuts down as many trees as can regrow will ensure consistent continuation of the entire forest – and with this – a good, long-term basis of life for future generations.

Idea

Strategy

Action

Product

At FARE we understand sustainability as a combination of social, economic and ecological fields of activity for our company, which are integrated into our core business.

♥ Social

The amfori Business Social Compliance Initiative (amfori BSCI) is a code of conduct based on the international working standards of the ILO (International Labour Organization), which supports globally active companies in building up ethical supply chains and monitors social standards worldwide as well as optimising them continuously.

FARE is a member of amfori BSCI. Our production sites for the manufacture of umbrellas have been audited according to amfori BSCI requirements and all have a valid audit result.

All amfori BSCI participants agree to the Code of Conduct (CoC) and undertake to comply with it. The amfori BSCI Code of Conduct comprises of the following principles as just some examples:

- Appropriate remuneration
- No discrimination
- Safety at work
- Reasonable working hours
- No forced labour
- No child labour

Member of amfori, the leading global business association for open and sustainable trade.
We participate in amfori BSCI. For more information visit www.amfori.org

♥ Economy

Every year we expand our range of products with new, innovative products. The proportion of sustainable umbrellas will constantly increase, because we want to meet the requirements of our customers and ensure long-term healthy growth for our company.

♥ Ecology

At FARE, we pay attention to environmentally friendly work processes through measures such as CO₂-neutral parcel shipping, bundling production orders, avoiding single parcel shipments, reducing paper consumption through the use of digital documents, switching to green gas and green power, etc.

It is important to us to save energy and CO₂ emissions. In cooperation with ClimatePartner, we have recorded and reduced our greenhouse gas emissions and have offset the unavoidable emissions through two different climate protection projects.

FARE has been ÖKOPROFIT-certified since 2021. Within the framework of this project, numerous outstanding environmental protection measures were implemented, which serve to reduce the consumption of resources by raising awareness among employees and by establishing purchasing criteria, to save water and energy, and to promote e-mobility.

Environment

Employees

Responsibility

Future

waterSAVE® – Every drop counts

Water-saving dyed cover material made from recycled plastics.

Progressive thinking is good – but only progressive action makes the difference. As part of our sustainability strategy, we not only rethink existing production processes, but also look at new, progressive strategies.

In our waterSAVE® cover material, which was launched in 2020, we use material made from recycled plastics and employ a revolutionary dyeing process that reduces the consumption of valuable raw materials as well as energy consumption and the impact of harmful substances on the environment.

» The approximate water saving per umbrella is

6L*

art. 2384, p. 74

* This is calculated based on water savings of 2 million litres for processing around 300,000 m² of fabric, from which around 350,000 umbrellas can be made.

art. 5644, p. 57

art. 7915, p. 75

Short and sweet

The waterSAVE® dyeing process yields numerous benefits in contrast to conventional dyeing processes:

» Reducing CO₂ emissions by more than

60%

» Avoidance of harmful chemicals:

Because of the transparent production process, the use of chemicals can be controlled and the exclusive use of detox-compliant chemicals can be ensured.

» Reducing energy consumption by up to

70%

» Savings in terms of water consumption of

90%

» Reducing sludge production by

98%

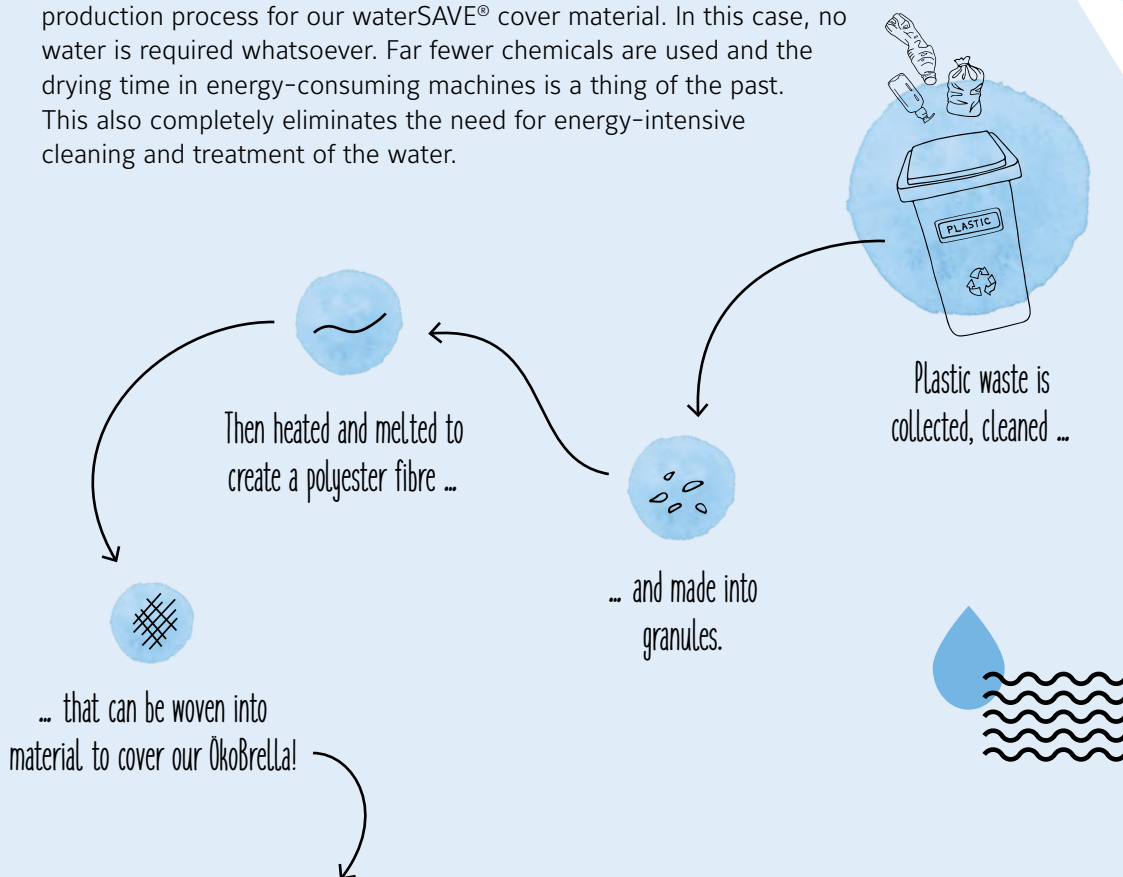

» Efficiency of dye uptake increases up to

98%

And this is how the waterSAVE® dyeing process works:

The yarn made from recycled plastic is already completely dyed in the production process for our waterSAVE® cover material. In this case, no water is required whatsoever. Far fewer chemicals are used and the drying time in energy-consuming machines is a thing of the past. This also completely eliminates the need for energy-intensive cleaning and treatment of the water.

With the use of our waterSAVE® cover material, we became the first winner of the new "Innovator of the Year" category of the PSI Sustainability Awards in 2021.

waterSAVE® becomes colourful!

While only black umbrellas could be equipped with this sustainable cover in 2021, additional colours and models were added this year. For example, we switched our popular ÖkoBrella family to waterSAVE® cover material. In addition, we have four models (**art. 5460**, **art. 1112**, **art. 7810**, **art. 7860**) where the cover is optionally available in waterSAVE® material.

Now with genuine wood handle

Our waterSAVE® cover material is now available not only in black, but in five other standard colours.

 **Natural white**

 **Red**

 **Lime**

 **Marine**

 **Grey**

 **Black**

All waterSAVE® models are marked with a label on the closing strap that only becomes visible when opened.

Excitingly designed

An umbrella offers a huge variety of refinement possibilities. On the following four pages we show you the different printing methods and their areas of application with warehouse stock.

Screen printing

Up to 8 fresh colours effectively showcase logos, slogans or witty sayings. The focus is on top quality and long service life.

White single print

White dual print

Coloured screen print without white undercoat

Coloured screen print with white undercoat

Dual printing

To obtain a brilliant, radiant white, the printing colour white is printed twice.

White underlay

To ensure the optimum realisation of the desired print colours, a white underlay is required on coloured covers. This underlay is slightly smaller than the coloured motif so that there is no flash at the edges.

Price tip

Silver, black and gold print colours do not require a white underlay. Printing on white covers: in this case, no additional white underlay is necessary.

Transfer printing

This printing process is particularly suitable for photorealistic motifs or motifs with very fine screens or fine gradients.

Sublimation printing

Special printing process for photorealistic motifs on white covers.

Colormagic

When dry, Colormagic printing is white; as soon as the surface becomes wet, the white print becomes transparent and the underlying colour is visible.

Doming

3D effect in vivid colours for a particularly demanding, photo-realistic result. High-quality finished surface, extremely durable.

Laser sticker

Finishing with a laser sticker made of wood or plastic is uncomplicated, flexible and inexpensive. The sticker features excellent adhesive properties and is also ideal for individual personalization.

Laser engraving

Discreet and elegant, razor-sharp contours and delicate depiction of the most minute details. Some umbrellas are equipped with a laser-capable soft handle and are marked accordingly.

Finishing of transparent covers/cut-outs

Due to the high-quality polyethylene material, screen printing with up to four colours is possible on our **AC regular umbrella FARE®-Pure (art. 7112)**, the **AC golf umbrella FARE®-Pure (art. 2333)** and the new **AC regular umbrella FARE®-View (art. 1119)**. In the case of Pure models, it should be noted that a maximum of two panels, not positioned next to each other, can be grafted.

Tube printing

The plastic tube of the **FARE®-Tube mini umbrella (art. 5792)** offers a new and unusual advertising space: It can be printed virtually seamlessly along its entire length. This makes it possible to customise logos and motifs with a high level of brilliance, durability and detail.

Variable filling

With the **mini umbrella FARE®-Fillit (art. 5052)** your options are only limited by your ideas and the size of the handle! Whether you fill it with small products, a voucher, or have a sweet thank you, we'd be delighted to help!

Individual sound brand

The **AC midsize umbrella FARE®-Sound (art. 7799)** is simply amazing with its ability to play audio logos, jingles or other beautiful sounds. The standard version is supplied with a clip of the classic song "Singin' in the rain". But it can also be customised with a sound of your choice, which sounds when the umbrella is opened.

Individual design in all-over print

A popular finishing variation is motifs that show a photo-realistic look on the entire cover. In order to better respond to this customer request, we now offer the FARE®-Allover Xpress service. Full digital all-over printing of the desired motif can be implemented from an order quantity of just 100 units. Minor matching inaccuracies cannot be avoided, but the overall picture is impressive. Design an individual umbrella easily in four steps:

STEP 1

You have five basic models available – just choose your favourite.

All information on the umbrellas can be found from page 78.

STEP 2

Send us your desired motive as a printable file (min. 90 × 90 cm at 300 dpi).

STEP 3

You receive an e-mail for approval showing how your motive will be implemented.

Other finishing options (at a surcharge)

Delivery times may be longer depending on the option selected.

Doming sticker on the handle
(only possible for art. 75002, 75460 and 71144)

Sleeve in digital printing
(only possible for art. 75002 and 75460)

Original proof

Single colour screen printing
on the panel or closing strap

Interior printing
Exterior cover coated in black (light sheen)

QUICKVIEW

- Full digital all-over printing of your chosen motive
- From just 100 units
- Ready for shipment approx. 20 days after approval *

Production-related offset between the segments cannot be excluded.

* Available shipping method: Sea freight approx. 50 days, shipping included, or air freight approx. 14 days, shipping subject to surcharge.

STEP 4

Look forward to your costumed umbrella!

Individual & versatile

With a little courage and by advance planning, individual customisations can be designed that are completely tailor-made to match the customer's Corporate Identity. It is worth it: Many of these unique designs have now developed into real cult items.

Cover colour

On request, we can also have the cover fabric produced in your own individual colour.

Cover in special colour with manual offset on one panel, inside coated metallic gold

Travelmate Camper (art. 6139)
with cover in special colour according to Pantone and 2C screen printing

Cover materials

Our high-quality polyester pongée material can be produced in standard or special colours from recycled plastics. With a particularly water- and energy-saving dyeing process, this becomes our waterSAVE® cover material that can be used in several popular standard colours.

Handle, shaft and ribs in individual colours

Custom colours can also be applied to all plastic parts and fibreglass.

FARE®-Style (art. 4784) with colour-coordinated handle, top and tips in stone-grey, handle rings shaft and ribs in cream

FARE®-Style (art. 5584) with cover and handle and details in special colours blue and mint with doming sticker

Fibreglass shaft with a diameter of 14 mm, individually printed with a photo-realistic motif

Individual handle design

We make individual special shapes or even an existing product design as umbrella handle possible.

Allover print

A highly popular variant for custom designs are motifs that extend over several panels or a photorealistic image on the entire cover on the outside or inside.

Photorealistic digital print motif across all panels

Cover in custom colour with three different motifs in allover print

FARE®-ÖkoBrella (art. 5429) with RPET cover in custom colour, allover screen print on selected panels and logo screen print on one panel

Digital allover print outside over all panels, inside coated black, with double cover light blue inside for appealing look and optimal brilliance of the artwork in all light conditions

Golf umbrella with photo-realistic digital print over all panels on the inside

Allover print on the inside, black coated on the outside. Each panel identical with coloured logo screen print on one panel

Double-layered cover with digital print on the outside and inside

Wetlook process

Discreet finishing gives the motif a tone-on-tone appearance in the scatter print when wet.

Colormagic printing

White overprint of the motif becomes virtually transparent when wet and allows the coloured elements underneath to appear.

Full-colour digital print across all panels, Colormagic overprint on one panel

Transparent material

Individual cutouts with transparent material on one or more panels.

Full-colour digital print on one panel and additional cutout of the window made of transparent material

Piping

Coloured or even reflective piping with and without printing is possible at various positions to create a special look.

External seam piping in custom colour

Reflective piping with 1C screen printing

1C screen printing on piping

Packaging

Make the most of fully printed cardboard boxes and gift packaging to optimally present yourself.

Closing strap

In addition to the print, the closing strap can be customised on request and provided with different closures, e.g. a push button made of metal or plastic.

Individual snap fastener

Sleeve

Individual sleeves show from the outside what is inside and make your umbrella something special, even with regular or golf umbrellas.

We can help you boost your sales

In addition to an extensive range of umbrellas, we can provide high-quality marketing and promotional materials to present your demonstration and sample models to optimum effect. We also offer individual and gift packaging along with selected merchandising items to encourage customer loyalty.
